dry, fold, put away)  
  
Clean the kitchen (wipe down  
counters, sweep and mop  
floor)

# APARTMENT CLEANING SCHEDULE

You're finally out on your own and can decorate and live however you want!

But with that newfound freedom comes a lot of responsibility, including keeping your apartment clean. It can be tough to keep up with cleaning when you're balancing work, school, and a social life, but it's important to make time for it.

Here is a regular cleaning schedule you can go by.

## **Set aside some time each week to clean**

Whether it's Sunday morning or Wednesday evening, pick a day and time that works for you and stick to it.

Dedicating even just 30 minutes to cleaning can make a big difference.

## **Do the dishes as soon as you use them**

Wash them right away or put them in the dishwasher so they don't have a chance to accumulate.

## **Keep common areas tidy**

If you live with roommates, make sure everyone pitches in to keep the living room, kitchen, and bathroom clean.

## **Don't procrastinate on laundry**

Doing a load of laundry may not seem like fun, but it's better than having to wear dirty clothes because you've run out of clean ones.
